

Answer 4 questions. You should indicate which 4 problems you wish to be graded. Write your solutions clearly in complete English sentences. You may quote theorems (within reason) as long as you state them clearly.

Name: _____

Circle problems to be graded: 1 2 3 4 5 6

1. Prove that the following polynomials are irreducible in $\mathbb{Q}[x]$, stating clearly any theorems you wish to apply.
 - (a) (3 points) $x^4 - 2x^3 + 6x^2 - x + 5$
 - (b) (3 points) $x^5 - 4x + 2$
 - (c) (4 points) $x^4 + x^3 + x^2 + x + 1$
2. Let R be a commutative ring with $1 \neq 0$.
 - (a) (2 points) Define what it means for an element $r \in R$ to be nilpotent.
 - (b) (4 points) Prove that the set of all nilpotent elements of R forms an ideal (called the nilradical of R).
 - (c) (4 points) Show that the nilradical is contained in every prime ideal of R .
3. Let $R = \mathbb{Z}[\sqrt{-3}] = \{a + b\sqrt{-3} \mid a, b \in \mathbb{Z}\}$.
 - (a) (3 points) Show that the function $N(a + b\sqrt{-3}) = a^2 + 3b^2$ is multiplicative, that is, $N(rs) = N(r)N(s)$ for all $r, s \in R$.
 - (b) (4 points) Prove that R is not a unique factorization domain.
 - (c) (3 points) Is R a principal ideal domain? Justify your answer.
4. Let R be a commutative ring with 1 and let M be a module over R .
 - (a) (3 points) State what it means for M to be a Noetherian R -module, and for R to be a Noetherian ring.
 - (b) (5 points) Prove that if M is a Noetherian R -module, then every nonempty set of submodules has a maximal element.
 - (c) (2 points) Give an example of a non-Noetherian commutative ring with 1.
5. (10 points) Using the rational canonical form, find one representative of each conjugacy class of elements of order 3 in $\text{GL}(4, \mathbb{Q})$.
6. Let $K \subseteq E$ be fields.
 - (a) (3 points) Define what it means for an element of E to be algebraic over K .
 - (b) (4 points) Prove that if $\alpha, \beta \in E$ are algebraic over K , then $K(\alpha, \beta)$ is finite-dimensional over K .
 - (c) (3 points) Deduce that the elements of E that are algebraic over K form a field.
